What Color Is Your Brain?™
A Fun and Fascinating Approach to Understanding Yourself and Others

What Color Is Your Brain? will break down barriers to build effective communication and cooperation

Why do you zig while others zag? What makes you seem unique or peculiar to some people, yet similar or comforting to others?

What Color Is Your Brain? A Fun and Fascinating Approach to Understanding Ourselves and Others by Sheila N. Glazov explains the similarities and differences that impact our thoughts and actions. Rather than offering an excuse for people’s behavior, Glazov explains why other perspectives differ from — or relate to — the viewpoints of others. Enjoyable, insightful, and easy-to-read, **What Color Is Your Brain?** is a guide to exploring who we are and why others see us the way they do. This entertaining read demonstrates how the four “brain colors” or personality types play a role in our everyday lives.
